

We are currently looking to recruit an inspiring **Technical Project Manager** who wants to take up a new challenge in China (Guangzhou) for our CQ Asia office.

Your challenge:

The future is within Asia, and you know it! This is your opportunity to be part of an international growing company who knows the value of the Asian market.

As manager of the technical team at the Guangzhou office you make sure that the development, purchasing and production of a product is done in an efficient, reliable and cost effective way. You'll have direct contact with production manager(s) and manufacturers to control the production and optimize the process if needed. Quality control and process optimization is an essential part and you make sure that the output is reliable and consistent.

The main responsibility is to manage the projects and developments and communicate them on a daily base with the project manager(s) in the Netherlands. You take responsibility for the process of mechanical engineering and implementation of a new design within the production process.

Your Team:

The Team in Guangzhou exist of 7 personal, of which 2 project managers, an office manager, 3 product specialist, 1 purchase specialist). The Team has an average age of 29 and they are all eager and willing to learn even more. You will report directly to the General Manager (Dutchman).

What you should bring:

Personal experience:

- an open minded personality
- team spirit
- humor

Technical experience

- you have experience with 2D and especially 3D software (preferable Solid Works)
- draw and evaluate technical parts, housings, components, connections and complex assemblies
- creation of feasible and cost effective designs.
- knowledge different production, decoration and assembly techniques such as: injection molding, metal stamping, pad printing, anodizing, friction welding, etc
- knowledge about different materials and their typical specifications such as: plastics, rubbers, metals, ceramics, glass, etc.
- experience with electrical engineering and testing is a pre.

General experience

- fluently English in speaking and writing.
- practically Mandarin in speaking and writing or willing to learn asap
- preparing and giving presentations for small and bigger audience
- skilled in Photoshop, Powerpoint, and complete MS office
- analytical and structured skills for reporting
- a structured and organized way of working, following and implementing procedures and a Western way of thinking is preferred within this function.

What we can offer you:

- An Asian challenge
- Working with different cultures
- Management development
- Career development (general manager)
- Working with and for some of the best Brands (Heineken, Prinsess, Tristar, etc)
- Help with re-locating
- Help with integrating in the internation community

Your company:

CQ International is an international operating company which is specialized in industrial product design, engineering and manufacturing. Most of the conceptual designs are made in the Netherlands. Engineering is done in collaboration with both offices in the Netherlands and China. Communication with manufacturers and quality control is done by the Local Chinese team.

We work with/for Chinese manufacturers for over 10 years and are one of the biggest foreign product design agencies in Guangdong province.

If you recognize yourself, you can apply with your motivation letter and resume to: working@cq-int.com an external assessment is part of the process
